Summary

Technical Product Leader with 6+ years in B2B SaaS, from Android engineer to Group PM owning $10M+ product portfolio. Known for 0-to-1 launches, tripling retention, and building AI-native operations that scaled teams without headcount. Hands-on in data, design. 2x AI Hackathon Winner.

Experience

Threecolts Remote – Warsaw, PL

Product Manager, AI Platform & Growth *Aug 2025 – Present*

- Led project replacing dozens of Google Sheets with a centralized Account Master Record processing $millions in monthly payouts for thousands of affiliate agencies, saving 10,000 ops hours/month and freeing up 20 people to focus on higher-value work.
- Increased team delivery velocity by 2.5x without adding headcount — built a "team brain" in Git (all workflows, best practices, and skills as .md files auto-updated after each Claude session via a custom skill) and mentored the Engineering Manager on safe delegation, eliminating the single-point-of-failure bottleneck.
- Built a custom CDP that became the data foundation for all GTM decisions company-wide — surfacing insights for non-tech teams (marketing, sales, AMs) across a $10M+ product portfolio: activation, resurrection, upsell, and ad targeting.
- Ran 5 ICP-segmented activation campaigns using the custom CDP, each driving ∼5% subscription growth within weeks across distinct customer segments.
- Convinced CEO and CPO to unify operations across 20 teams — led migration from Jira/GitHub Projects to **Linear**, ensured 150-employee adoption by building webhook-based Linear Triggers, a custom app showing downstream impact of de-prioritized items, and Linear AI agent (Claude wrapper) auto-generating reproduction steps + RCA for incoming requests, saving 2–3 hrs/day per engineer.
- Ran a phased free trial rollout (constraint: free-to-paid conversion had to hold) — eliminated a 65% signup-to-first-value drop-off and improved paid conversion as a bonus.
- Cut time-to-market from weeks to days for Threecolts' #1 priority launch — a $16M+ flagship product — by independently prototyping the solution to resolve misalignment between CPO, CTO, and CRO.

Threecolts Remote – Warsaw, PL

Group Product Manager (Helpdesk & B2B2C) *Apr 2023 – Jul 2025*

- Outgrew the senior PM mentor assigned to me within month 1, owning 1 product across 2 brands fully; by month 6 asked to lead a $5M ARR portfolio; at month 26 declined Head of Product to join Platform team for larger-scale impact.
- Built a Growth Engine (acquisition filters, activation checklist, upsell & resurrection playbooks) to make all portfolio decisions data-driven — used it to kill 2 product verticals despite founders' pushback, escalating directly to CEO/CPO; ARR doubled $500K → $1M, retention 3x (3.5 → 11.5 months).
- Reduced enterprise onboarding time from 2 months to 1 week by automating complex business processes and eliminating manual handovers through a unified product-level workflow.
- Made product setup self-serve by redesigning email and contact form configuration — eliminated 5 support calls/week to zero.
- Prioritized core features refactor over new feature requests, fighting back against stakeholder pressure — engineers cut bugs from 20 to 2/week, directly enabling the $68k MRR customer resurrection and the product stability enterprise accounts required.
- Personally redesigned the entire product UI/UX in Figma — 40% feature adoption increase, clear aha-moment during activation, customers wrote unprompted how much they LOVED it; built solo from first principles what took competitors with dozens of PMs + Designers 2 years to match.
- Built 24/5 Customer Support and QA teams from zero — hired and mentored 5+ direct reports who scaled both departments to full autonomy, handling all customer volume independently.

HICX Remote – London, UK
Technical Product Manager *Oct 2022 – Apr 2023*
- Integrated Digital Adoption Platform into the product and drove its commercialization as a paid add-on, generating $60K in new revenue.

Coinchange Remote – Toronto, CA
Product Operator *Jun 2021 – Mar 2023*
- Built unit-economics cohort analysis that revealed 95% of revenue came from 5% of customers (B2B). Pitched CEO to pivot from B2C to B2B — company shifted within a year.
- Automated sales research pipelines using Python, Selenium, increasing qualified lead output by 400%.

OnlinEventSpace Minsk, BY
Founding Product Manager (0 to 1) *Sep 2021 – Aug 2022*
- Convinced the shareholders to launch the product, projecting 17% yearly profit growth. Led it from the discovery phase to the first payments.
- Increased MQL-to-SQL conversion by 50% by redesigning the Customer Journey Map (CJM) and core onboarding workflows.
- Validated MVP concept via Figma prototype with 9 target audience representatives before development began.
- Built product marketing from scratch with zero budget — recruited and led 2 interns on a pay-for-performance deal, generating the first SQL within a month.
- Sought growth expertise outside the company by pitching to Mesto VC Community by Spiridonov — validated product direction and secured ongoing mentors who accelerated PM development.

iTechArt Minsk, BY
Android Developer *Nov 2020 – Sep 2021*
- Engineered mobile solutions for 100k+ end-users, ensuring high performance and code maintainability in high-load environments.

Achievements & AI Projects

2x AI Hackathon Winner | *LLM Automation, Agentic Workflows* 2025
- Developed an MCP-based automation tool that autonomously coordinates communication for third-party logistics.
- Won Solana hackathon as market researcher and customer development lead — conducted competitive research and secured first customer interview.

Technical Skills & Tools

Strategic: Workflow Automation, GTM Strategy, Stakeholder Management, Retention Engineering, Unit Economics, People Leadership, ICP Segmentation
Technical: SQL (Metabase), Python (Databricks), AI/LLM Automation (Claude/GPT API, Cursor), REST API Design, Android Development (Legacy)
Tools: Mixpanel, Figma (Design Systems), Apollo.io, HubSpot, Linear, Jira, Metabase, v0.dev, LangChain
Languages: English (Full Professional), Russian (Native), Belarusian (Native)

Education

Belarusian State University of Informatics and Radioelectronics Minsk, BY
Bachelor of Science in Software Engineering and Economics; Minor in Math *2022*

Reforge Online
Growth Series: Data-driven decision making and Growth loops *2023*

GoPractice Online
Product Growth Simulator *2023*

GoPractice Online
SQL Simulator for Product Analytics *2023*
